

Aluminum Composite Panels

Whether it is a highlight or the entire exterior surface, aluminum composite panels offer you the defined looks that will make your building stand out and be noticed. Our aluminum composite panels will give your next project the clean, innovative and dramatic appearance you are looking for with years of maintenance free performance.

We have been and continue to be one of the leading distributors, fabricators and installers of aluminum composite panels for over 20 years. We're one of the leading national fabricators and regional installers of Aluminum Composite Panel systems as well as other Metal Composite Material systems such as copper, zinc or stainless steel.

We design, fabricate, and install several standard Aluminum Composite Panel systems for the exterior walls of commercial, institutional, and industrial building projects. Although our systems have a great performance record and have been rigorously tested, we also have the ability to design and fabricate custom systems to meet unique building applications.

Why Choose Aluminum Composite Material?

- Strong, lightweight, high performing product
- Easily Fabricated & Installed
- Endless formability for radius and column cover applications with a 30 year finish warranty
- Endless palette of colors
- Smooth, non-embossed surface
- Ultimately flat
- Corrosion resistant
- Building code approved, performance tested systems
- Manufactured in Controlled Environment, Leading to Increased Quality Control
- Estimating and Design Services eliminate any potential inconsistencies before panels arrive on jobsite
- Excellent Strength to Weight ratio
- 100% recyclable
