

Precision Walls Gives Back To The Community.

The Precision Walls' Charlotte office partnered with BE&K, Olympic High School and Habitat For Humanity on the 3rd Annual Habitat House through Olympic High School's Construction Class. Students enrolled in this class have been exposed to every phase of residential construction, from classroom studies to hands-on tool belt work in every trade from foundation to roof. PWI donated time through providing instruction and expertise in hanging and finishing of drywall along with detailed job descriptions that are available to pursue to the construction class students. The Precision Walls team worked closely with the students to inform, instruct and answer questions as students tried their hand at drywall installation.
